

## **The Chocolate Factory Is Open**

Willy Wonka is searching for a child to take over his candy business. He has five golden tickets. Charlie Bucket, one of the lucky children to receive a golden ticket, enters the weird and wonderful world of Willy Wonka's candy factory. They dance their way through the movie, until the end, when Willy Wonka must make a decision: Who of the five lucky children will inherit his factory? Film is really funny. Willy Wonka is played by Johnny Deep. Oompa-Loompas were "multiplied" by special effects experts using computers. He is only 127 centimeters tall. Only 4,000 of the 114,000 chocolate bars in the film are real and the chocolate river is made of water that has been thickened with a substance.

This article I chose because in this film played one of my best players Johnny Deep. I haven't seen it yet but I wish to go to library and take DVD and watch it. Everyone I asked says that is a very good film. It is based on the book by Roald Dahl that I read it. I really like a book and I am interested if a film is the same or it has a lot of changes.

1. Squirrels-veverica-animal that feeds on nuts and seeds and climbs trees
2. Convey-poslati, prinesi-transport or carry to a place
