Dear Vesna,

At first I am greeting you. I hope you are well. This day was interesting and exciting, that why I will describe you in short: We had a giant slalom race at Soriška planina with Fire Company. The race began at 10 a.m. Before the start we had training and then we went to the start. My number was 33. Al my friends started before me. As I started on the track, I had good feeling. The track was good and I was happy because I reached the goal. We were waiting for the results for an hour, in the meantime we were skiing. Then was the announcement of results. I was really happy when I heard I was the first and won the gold medal. All my friends were happy too and we were going to celebrate this medal. With kind regards I send you this letter and I hope you will write me too.

Yours

*Jure*
