

LIVING IN A FOREIGN COUNTRY

Življenje v tuji državi !

Every human know where would like to live. A lot of people stay where they were born, others want to change a town, some of them want leave its own country forever.

Slovenia for example has more immigration than last three years. Reason for that is: Slovenian people can not get a job (they want to work) and we are in Europe Union. They want to move out from Slovenia to find a job like they need and want. For example living in **Germany** is not as easy as it seems. They have paychecks and they can get a job if they want. Flats or apartments are so expensive and you can not leave like that in Germany with Slovenian paycheck.

United States of America has very high standard of living and what is the most important and interesting you can get a job as quickly as you want. Apartments are not expensive. You can find a job in each corner. Bosses are quite interesting and nice to each employee. If you have "lucky star" in your life than you can become what ever you want. If you want to be famous and reach and you have talent for singing, acting, painting, creating and that you have a good sense of humor than I think you can be what you want.

United Kingdom is one country in Europe and it is almost the same thing as in Slovenia. But there you can find a good place to live and a great opportunity to succeed. United Kingdom is well-known country and it is reach too.

Spain is one county in Europe too. But we all know that people are very friendly and give a great hospitality. You can live there happily and you can be always in good mood. Air ticker is not too expensive to visit that country. You can be there just three months in other case you must have a visa card.

Finland is one of the coldest countries on the north. In the winter times it can be -40 to -50 degrees Celsius.(°C) .In the summer time the highest temperature is just 20 degrees. But Finland is very famous country, it has a lot of lakes.....(Finland is known from lakes). This year we could watched Eurovision Contest 2007 in Helsinki. The capital of Finland is Helsinki. In Finland you can hardly get a job. People are not nice to anybody. If they do not know a foreign, they do not talk to them.
