

## My opinion about the marijuana

I think that the government did the right thing when they decriminalized it. If alcohol or cigarettes are legal, why wouldn't marijuana be legal too. I really do not have an opinion about legalizing marijuana. If the government in Slovenia legalizes marijuana, they would have more control about using it and would get extra money from taxes. Perhaps the number of people who smoke marijuana would be smaller than now. Marijuana will no longer be illegal. Some people smoke marijuana only because it is illegal, they like to do things against the law. So that will not be interesting any more and they will stop smoking it. But then they could start using other drugs, hard drugs, because they are illegal. Because of that I have no opinion about that problem.
