

My room

My room is on second floor. It is always untidy and messy. It is very big and light. I also have a balcony.

In my room I spend most of my time. I study, do my homeworke and sleep there. In it I have silver furniture. In right corner I have a **desk**. On it I have a computer, books and usually also a lot of unnecessary trings, such as mobile phone, wallet, CDs, chocolate, ... In left corner there is **bed** and **couch**. By bed stands big **closhet** for my clothes. By the wall there are **bookshelves**. They are usually empty and dusty because I never feel like giving books back to their rightful place. They are always on my desk or on sofa. I used to have **curtains** on windows but not any more because my cats had ruiend them. I also do not have any flowers. They do not trive in my room. Probably because I forget to water them every day or because they are not on a window sill.

I like my room because I have same privacy there and I can settle things, such as posters and pictures on the wall the way I like it and I want them to be.
