

Homework

Red wine on a carpet

I got this homework because some talking during doing some exercises about If clauses. So I got it, when we were talking about red wine on a carpet. In this essay I will talk about methods how to clean a stain on our carpet from red wine.

There is a lot of methods they can be used to clean a stain. The most simple is that you use wet rag and wipe up as much red wine as possible. Then use powder for carpet and wash a carpet. Some of students said that you can put on red wine a white wine. White wine will neutralize red wine and red colour will dissapear. I do not know if that is real because I do not believe that this really works. You can also change your carpet, so you do not have any problems with cleaning it. But a new carpet costs money.

The easiest solution is that you do not drink red wine. This solution is the best for your health, your wallet and your nerves. No body poisoning with alcohol and no problems with cleaning and bad will. You will live healty and without one problem – red wine on a carpet.
