

## Slovenia

Slovenia is one of the smallest countries in the world. The capital is Ljubljana. I think that it is a great town and when I finished the school in Lendava, maybe I will go there to study. Because Slovenia is a small country there do not live a lot of people. So, Slovenia has got about two million inhabitants. Most of the people live in cities, but they are not very big. The climate is continental. It means that we have cold winters and hot summers. Dinarsko-Kraški svet is in the south, Alpski svet is in the north, Panonski svet is in the northeast and Primorski svet is in the southwest of Slovenia. Kras has not got a lot of inhabitants, but lots of tourists visit this place, because there they find a lot of caves like Postojnska jama. It is the famous cave. The proteus lives there and it is unique. I think that the Alps are one of the most beautiful place in Slovenia. When we are under stress we visit Alps and relax there. The mountains are not so high, but the highest is Triglav. It is nearly 3000 meters high. Panonski svet celebrate of the green flat. We found there Murska Sobota and Lendava. On this zone are some rivers: Mura, Ledava... Near the sea there are some nice towns like Koper, Izola, Portorož and Piran. Koper has got the most important port in the bay. That is real, that Slovenia is a small country, but very rich. We had saline to. I like the best about Slovenia that there are a lot of interesting and different places. Every year I can go with my parents and our relatives to mountains in Velika Planina. I like to go there. When I was about seven years old we went with our friends in Lipica. There me and my friend went to ride a horse. At first I was so scared, but than it was very funny. So I think that Slovenia is a very interesting country and I'm happy because I live there.
