

ARTIFICIAL INTELLIGENCE (AI)

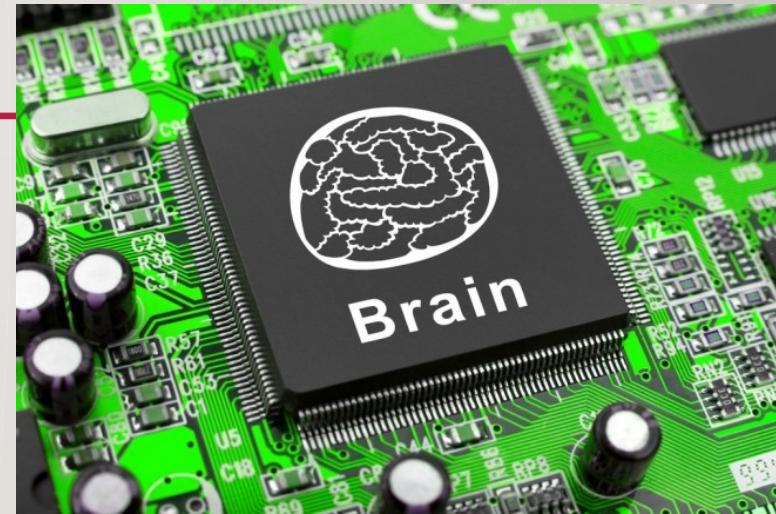

COUNTENTS

- 1 what is AI
- 2 history of AI
- 3 how does AI work
- 4 examples of AI in dail

WHAT IS AI

- it is a program
- self-learning

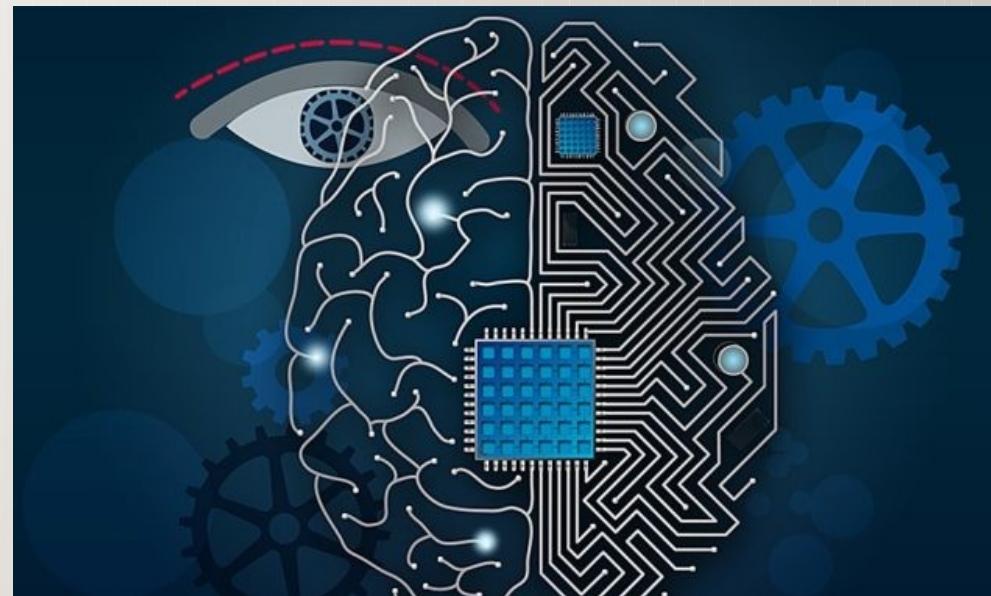

HISTORY OF AI

- ancient Greeks
- philosophers
- programmable digital computer

HOW DOES AI WORK

- build brains
- AI = demanding task
- AI far off brains

EXAMPLES OF AI IN DAILY LIFE

- virtual personal assistants
- smart cars

picture2- smart car

picture1-virtual
personal assistants

SUMMARY

1 what is AI

2 history of AI

3 how does AI work

4 examples of AI in daily life

CONCLUSION

- expand
- electronic devices
