

The Bermuda triangle

It's an area at east coast of North America. It lies between Bermudska island-Portoriko-Fort Lauderdale. Its known as mysterious place, where planes, ship and their crews disappear without any clues. It is also called the Devil's Triangle, Limbo of the Lost, Hoodoo Sea and the Twilight Zone. The first one who noticed strange occurrences was Christopher Columbus.

EXPLANATIONS:

-NLP

-magnetic field

~it's scientifically proved that there is bigger magnetic attractiveness. In a lot of cases it was said that the compasses were acting strangely and they and the magnetic needle was spinning around all the time.

-Atlantida

~there is a theory that here was once an island called Atlantida with well developed civilization. That island has sunken and the sunken apparatus are attracting ships to the bottom of the ocean.

-meteorite

~ someday a big meteorite flew and clashed in the Gulf of Mexico and changed the structure of it. That's also a theory why the dinosaurs extincted. And if the meteorite flew from west it compressed area and the Bermuda triangle is to be found right above the compressed area, which emits magnetic attraction.

-gases

~there are some light gases who escape from the bottom to the surface and they make the water lighter, so that the ships can plunge, because they are not elaborated to navigate at rare liquids.

The people who survived talk about light phenomenon on the sky, but the scientists attribute this to a meteorite.

In the past 100 years, the Bermuda Triangle has claimed over 1000 lives. The most known tale about Bermuda triangle is about Flight 19. Five planes

were having a routine practice mission. When they finished their mission, they got another mission to fly somewhere else. But apparently they flew into Bermuda triangle, the compasses stopped working and there was no more sign about crew of 13 people.
