

JAMES BOND.*

In my presentation I would like to **portray** the world's most famous secret agent "the Spy who Never Was". He is 007 and he works for the British Secret Service. He introduces himself with the **immortal** words, "My name is Bond, James Bond."

James Bond 007 is a **fictional** character created in 1953 by writer Ian Fleming, He was **featured** in twelve novels and two short story collections. Fleming knew all about spying because during World War II he worked as a spy for the British navy. Many of his adventures were even more amazing than Bond's. He had visited many of the exotic locations where the stories are set, and he based many of his fictional characters on people that he had actually met during the time that he worked in the intelligence. Some people believe that Fleming used a double agent he knew, Dusko Popov, as the model for James Bond. Popov lived the life of a millionaire playboy traveling on business for the **imports/exports** industry and was a **notorious womanizer**, loved the best drinks, and a good game of poker-all **attributes** Bond would later possess.

The character of James Bond is also portrayed in a very successful film series. Between 1962 and 2006, there were total

of 21 Bond movies The newest movie in the series, **Quantum of Solace**, is to be released at the end of this month.

It was Scottish actor Sean Connery who became the original Bond and portrayed the character until 1967's. After that there have been 4 actors who replaced this **remarkable** actor. I think Irish actor Pierce Brosnan play was the best. The latest Bond is Daniel Craig. Probably you've all watched some of the Bond films. For example: Casino Royale ,Diamonds Are Forever, golden eye, Dr.No.

There have always been beautiful women who charm James Bond.

The most

attractive actresses and models have starred in the films

James Bond is the perfect spy and the perfect gentleman. His manners are perfect. His clothes are impeccable. They come from the best tailors and they never crease. He drives the most fantastic fast cars and he is licensed to kill. He has a lot of enemies, and they are the most dangerous people in the world. Many of them just have on ewish, and that is to dominate the world and everyone who lives in it. It is James job to make sure that they do not achieve their ambition. When he kills his enemies, he does it with great style. Nothing can be quite as dramatic or explosive, as the end of a James Bond story. Very often he finds himself in difficult situations, but he always maneges to find a way to escape.
