

Steve Jobs

Steven Paul Jobs was born in San Francisco on February 24, 1955.

He was quickly adopted by Paul and Clara Jobs. They lived in city called Mountain View. He always knew he was adopted but, he met his real parents when he was 27 years old.

This is Steve Jobs' wardrobe evolution since 1998(slika v predstavitvi).

As you can see, he was always wearing blue jeans and black T-Shirts.

Steve was very interested in technology. That was his favourite thing in his life.

He and his friend Steve Wozniak invented the company Apple. The company has become successful.

Today we know a lot of Apple's products. Most known: iPad, iPod, iPhone and iMac. Apple also invented iTunes. On iTunes you can play, download, and organize video on personal computers.

He was married to Laurene Powell Jobs. They had three kids. Before Steve was married he had a daughter Lisa Nicole Brennan-Jobs.

Jobs died on October 5, 2011. He died because he had a cancer.

I think we will always remember Steve Jobs as a great inventor- that is why i chose him.
