

POLLUTION

- Destroying, poisoning nature and environment
- It is a global problem

There are different types of pollutions

- **Water pollution:** Caused by:
 1. sewage (by people),
 2. wastewater (by factories),
 3. oil spill.
- **Air pollution:**
 1. from cars
 2. from factories
- **The result** is global warming and ozone holes (radiations from the sun)
- **Light pollution,**
- **Noise pollution.**

Both in big cities.

What can we do?

- Recycling,
- More cleaning plants
- Educate people to change their attitude to nature.
