

A photograph of a dense patch of Praprotnice (Brstnice) ferns. The ferns have numerous small, bright green, oval-shaped leaflets arranged in a regular, pinnate pattern along thin, dark stems. They are growing in a forest setting, with a thick layer of green moss visible on the right side and some dry, brown leaves and twigs scattered on the ground. The text "PRAPROTNICE (BRSTNICE)" is overlaid in large, bold, red capital letters in the center of the image.

PRAPROTNICE (BRSTNICE)
